

New TIMOTEC group

Dear business partners,

we would like to inform you that on 13.5.2025 a capital merger of three European companies took place: **TIMOTEC Reinraum - und Automatisierungstechnik, BLOCK Technology and FOR Clean**. The newly formed TIMOTEC business group combines the highly professional expertise and high-tech solutions of its member companies. The three companies are managed by the same controlling person who will ensure their integration to achieve joint synergies and ensure the growth of the group.

The establishment of the TIMOTEC group is a significant step in the strategy to build a strong supplier of customized solutions for isolator technology, laminar flow systems, automation, robotics, cleanroom and its equipment, especially in the pharmaceutical, science and research, optoelectronics, semiconductor and healthcare industries. Combining the expertise and technological solutions of TIMOTEC group companies opens up new opportunities in existing and new markets. And it will enable us to provide comprehensive, tailor-made solutions in many industrial sectors, including fast service. Thanks to its strong know-how and a broad portfolio of goods and services, the TIMOTEC group is able to provide individual solutions to customers, especially in DACH and CEE, with a view to further expanding its territory.

"The new TIMOTEC group enables the exchange of expertise and the creation of synergies between companies. This increases operational efficiency, supports investment in new product development, and expands global market presence. As a result, we are able to offer our customers tailor-made solutions, leveraging the full breadth of our product portfolio. All our steps are aimed at becoming a leading European provider of custom solutions, especially in the pharmaceutical, scientific research, optoelectronic, semiconductor and medical sectors," adds Filip Bětík, COO of the TIMOTEC group.

The TIMOTEC group consists of a team of highly qualified, committed and professionally experienced employees. This, together with the planned investments in development and production as well as the expected acquisitions in the European market, will be the basis for the further expansion of this group.

Information about companies in the **TIMOTEC** group:

TIMOTEC Reinraum - und Automatisierungstechnik is a German manufacturer and supplier of cleanroom solutions, laminar flow workstations and other cleanroom elements for the optoelectronic and semiconductor industry. More information: www.timotec.de

BLOCK Technology is a Czech manufacturer and supplier of isolator technology and technological equipment intended mainly for the pharmaceutical industry, science and research and the healthcare sector, with its own know-how and development. More information: www.blocktechnology.eu

FOR Clean is a Slovak manufacturer of stainless steel furniture and built-in clean rooms. With 26 years of experience, it is a proven supplier especially for engineering companies and BLOCK Technology. More information: www.forclean.sk

For our business partners, all business processes remain unchanged, and our contact persons will continue to be fully available to you.
